

*It's that time of year!*

## **Spring Sprinkler Start Up**

It's that time of year again when the snow is gone, the birds are back, and the lawn needs watered! Here are a few tips for you to get started this year.

- First you will want to turn on the main water valve to the system. You will want to do this slowly and allow the lines to pressurize.
- After the water is turned on, start turning on one zone at a time. Do a quick walk through looking for broken heads or leaks. You may also need to adjust where the heads are spraying.
- Once you've gone through each zone make sure that your system is programmed correctly. If needed adjust the program to your needs.

You're all set for the season! You can relax now and look forward to the warm summer days ahead!

If you need any help or would like us to do the start-up for you give us a call at (208) 745-9406. For the season we have a \$99 sprinkler start up special. You can get the coupon below!
